

INFORMATION SHEET FOR USERS

The European Union regulation n°1907/2006 (REACH) ensures information relating to hazardous materials are communicated through material safety data sheets (MSDS). Our continuous glass fiber-based and carbon products are considered as articles that do not release hazardous substances. For this reason, MSDSs are not required for these products by REACH regulation.

To facilitate the safe handling and use of glass fiber products, CHOMARAT has decided to supply its customers with user information sheets.

Diagonap A(1) XVC.Y.Y.Y(2) and Diagonap A(1) W(3) VC Z(4)

- (1) A : D, DTF
- (2) $0 < Y < 145$
- (3) $1000 < W < 6000$
- (4) Z: 2-P01

1. Product and company identification

1.1. Product ID

Name of product(s): **Diagonap A⁽¹⁾ XVC.Y.Y.Y⁽²⁾ and Diagonap A⁽¹⁾ W⁽³⁾ VC Z⁽⁴⁾**

Substance/mixture/article: article

1.2. Product use

Reinforcement

1.3. Company ID:

CHOMARAT Textile Industries
39, avenue de Chabannes
07160 Le Cheylard
Tel.: 33 (0)4 75 29 81 00
Fax: 33 (0)4 75 29 20 12
E-mail: info@chomarat.com

2. Hazard identification

CHOMARAT Textile Industries

39, avenue de Chabannes
07160 LE CHEYLARD – France

tel. +33 (0)4 75 29 81 00
fax +33 (0)4 75 29 20 12

info@chomarat.com
www.chomarat.com

2.1. Article classification

The product is not classified under regulation (EC) No. 1272/2008 (CLP).

2.2. Labeling Elements

The product does not have to be labeled under regulation (EC) No. 1272/2008 (CLP).

2.3. Other hazards

The hazards involved with using the product are due to fibers and dusts: stings, skin and eye irritations.

Continuous filament glass fibers are not required to be classified as an irritant (Xi) under European directive 97/69/EC.

Carbon fiber is good driver of electricity and can provoke short-circuits when in contact with an ill-adapted electrical device

3. Composition and information on the components

The product does not contain any substances that feature on the list of substances of very high concern (SVHC), which are subject to approval.

4. First aid

In case of skin irritation:

- Wash with cold water and soap for at least fifteen minutes.
- Do not use warm water as this will dilate the skin's pores, which will cause further penetration of the fibers.
- Do not rub or scratch affected areas.
- Remove clothing.
- If skin irritation persists, consult a doctor.

In the product comes into contact with the eyes:

- In the case of dust in the eyes, rinse abundantly with clean running water for at least 15 minutes. Organize transportation towards the closest medical facility and have a doctor conduct an examination and administer treatment as quickly as possible.
- Remove contact lenses if worn before continuing to rinse the eyes.
- Prevent the person from rubbing their eyes.

CHOMARAT Textile Industries

39, avenue de Chabannes

www.chomarat.com

If inhaled

- Place the person in the open air.

If ingested

- Contact a doctor, but do not induce vomiting. If the case of vomiting, prevent the person from ingurgitating their vomit. Do not do have a person who is unconscious or convulsing ingest anything.

5. Fire fighting measures

The product is partially combustible.

Prohibited or non-recommended extinguishants

None

Recommended extinguishants:

Pulverized water, powder, foams, carbon dioxide.

Fumes in the event of fire

CO and CO₂, NO and NO_x, carbon particles, dusts and mineral fiber debris. The carbon particles can cause short circuits when they come into contact with an electrical device.

Special protective equipment

If substantial quantities combust, use autonomous respiratory devices.

6. Measures to be taken in the event of accidental dispersion

Personal precautions

Not applicable – The product remains in its massive form.

It is recommended that personnel handling dispersed substances wear class P3 dust filtering respirator masks.

Environmental protection precautions

Have destroyed or recycled in accordance with the local regulations in force.

7. Handling and storage

Handling:

CHOMARAT Textile Industries

39, avenue de Chabannes
07160 LE CHEYLARD – France

tel. +33 (0)4 75 29 81 00
fax +33 (0)4 75 29 20 12

info@chomarat.com
www.chomarat.com

- Handle the material with care – do not cut the carbon fiber unnecessarily. Electrical conductor; do not place in contact with electrical power sources;
- Avoid dispersing airborne fibers – Handle the fiber in a well ventilated rooms (ventilation devices coupled with filters which prevent airborne fibers from being discharged into the open air) in which the electrical devices will have been excluded or protected in sealed or pressurized chambers.
- Insulating varnishes can be applied to the electronics and electric terminals.
- Avoid frictions which generate airborne debris.

Storage:

- The storage conditions do not influence the product's properties, but it is recommended the product be stored alone, in a dry, dust-free place, away from direct sunlight and in its original packing.

8. Exposure control / Personal protection

When dust is generated or ventilation is insufficient, handle while wearing personal protective equipment: work clothing and gloves, dust masks and glasses.

- Respiratory protection: Wear a type P3 protective mask with filter in the event of dust dispersion.
- Hand protection: Always wear protective gloves that comply with the EN 374-1/2/3 and EN 420 standards when handling the product.
- Eye protection: Wear protective glasses or goggles which protect against dust.

9. Physical and chemical properties

| | |
|-------------------------------|-------------------------|
| Physical state: | solid |
| Softening point of the glass: | > 800°C |
| Other: | electrically conductive |

10. Reactivity and stability

The product is stable under normal conditions of use.
Potential for dangerous reactions.

CHOMARAT Textile Industries

39, avenue de Chabannes

tel. +33 (0)4 75 29 81 00
fax +33 (0)4 75 29 20 12

info@chomarats.com
www.chomarats.com

Conditions to avoid: excessive heat; a strong hardening can discharge toxic gasses and generate hazardous breakdown products.

Materials to avoid: Oxidizing agents, strong acids and bases

11. Toxicological information

Continuous filament glass and carbon fibers used are not respirable according to the World Health Organization (WHO) definition. A respirable fiber has a diameter (d) less than 3 µm, a length (l) longer than 5 µm and an l/d ratio greater or equal to 3. Fibers with diameters greater than 3µm, which is the case of the continuous filament fibers that we use, do not reach the lower respiratory tract and therefore, have no possibility of causing serious pulmonary disease.

Continuous filament glass fibers do not possess cleavage plans which would allow them to split length-wise into fibers with smaller diameters. Rather, they break across the fiber, resulting in fibers which are of the same diameter as the original fiber, but shorter in length, and a small amount of dust.

12. Ecological information

The environmental exposure of the components of this product is limited because of the physical form of the product.

Carbon fiber is an electrical conductor; it can cause short circuits when in contact with an electrical device, notably when airborne fibers are dispersed in the zone.

Do not incinerate the product.

13. Considerations relating to elimination

Product disposal

Controlled incineration, in accordance with the regulations in force.

Disposal of packaging

Controlled incineration

14. Information relating to transportation

The product is not classified as hazardous for ADR-RID-ADN (land, rail, inland waterway), IMDG –IMO (sea) and ICAO-IATA (air) transportation.

15. Regulatory information

This product is not subject to marketing approval or usage restrictions.

This user information sheet complements the technical data sheet or the instructions for use, but does not replace them. The information it contains is based on our current knowledge in regards to the concerned product at the indicated date. They are given in good faith.

All of the mentioned regulatory requirements are provided simply to help the addressee meet his/her obligations when using a product that may contain hazardous components. This list should not be considered as exhaustive and does not exempt the addressee from personally ensuring whether he/she is bound by other obligations as a result of additional texts regarding the storage and handling of the product, with this remaining his/her sole responsibility.
